Single Tap Extension Cords

Pro Glo® SJTW (300V) jackets offer high visibility for safety underfoot and extra flexibility in cold weather. Each male plug has a built in amber neon light which indicates that there is power in the cords and outlet. In addition, these extension cords provide Continuous Current and Ground Monitoring (CGM), an OSHA safety requirement. A green neon light in the female connectors lets you know at-a-glance that there is ground continuity.

Triple Tap Extension Cords

Pro Glo® SJTW (300V) jackets offer high visibility for safety underfoot and extra flexibility in cold weather. The triple tap connector provides three standard 15A-125V outlets for additional power where it's needed. Each male plug has a built in amber neon light which indicates that there is power in the cord and outlet. In addition, these extension cords provide Continuous Current and Ground Monitoring (CGM), an OSHA safety requirement. A green neon light in the triple tap female connector lets you know at-a-glance that there is ground continuity.

Sub Zero® Cold Weather Extension Cords

Designed for use in Cold Weather where flexibility is the main concern

The special SJEOW rubber elastomer jacket prevents the cords from cracking and will remain flexible in temperatures well below freezing. Passes the UL cold bend test at -50°C. Heavy duty molded on plugs and connectors have large strain reliefs that prevent the ends from pulling away from the cord body.
